

Tai-Yun (Jack) Chen

I'm Jack, a Product / UX Designer focused on B2B and system-level products. I bring 10+ years of hands-on design experience, including 8 years in technology products and B2B/system services at Wistron. My work spans AI laptops, service robots, drone control systems, medical rehabilitation products, and ESG-related initiatives. I approach problems from the perspective of “where the business should go next,” using research and storytelling to clarify goals, align stakeholders, and translate direction into shippable, testable product experiences.

Job History ✨

✨ 2016-07 ~ 2025-02

Assistant Technical Manager (UX/ Product Design)

Wistron Corporation

Led UX/product design for hardware–software integrated products, aligning PM/engineering/ID and validating in real deployments.

- **AI Laptops & Dual-Screen Devices:** researched Creator/Gamer needs; defined workflows, IA, and interaction models; explored AI-agent use patterns and UX guidelines.
- **Service Robot System (Wifundity):** designed admin dashboard + robot UI for mall/hospital/hotel scenarios; ran field tests, triaged issues, and iterated with RD.
- **Drone Control Station:** designed controller UI combining joystick + touch; optimized button layout and mission flow with operators; supported XPONENTIAL (US/EU) demos.
- **GenAI Workflow Enablement:** introduced repeatable AI-assisted concept/visual pipelines for ESG materials and exhibition content to improve speed and consistency.

✨ 2021-09 ~ 2022-03

UI/UX Design Mentor (Contract)

Reborn Academy

- Mentored university students interested in UX design; helped them understand product design processes, industry collaboration, and career planning
- Ran design workshops and 1:1 sessions on user flows, UI design, and cross-functional collaboration
- Provided portfolio feedback; guided storytelling and design point-of-view to strengthen interview readiness

✨ 2014-01 ~ 2016-07

Senior Web Designer (Front-End Designer)

Taipei Digital Group

- Designed corporate websites, campaign pages, and CMS template products; covered visual design and front-end implementation (HTML/CSS, RWD)
- Delivered and maintained 20+ web projects; improved efficiency and maintainability through modular templates
- Worked with marketing to optimize campaign page UX and visual communication to increase dwell time and conversion
- Supported SEO structure improvements to raise search rankings and grow organic traffic across multiple sites

✦ 2008-12 ~ 2009-12

Visual Designer

UrWay Integrated Design

- Completed 40+ projects in one year, including Flash campaign sites/games, corporate websites and maintenance, key visuals, and CIS
- Served as a client-facing contact to align requirements and support proposals, reducing revisions and communication costs
- Helped improve internal design processes to shorten project cycles and increase delivery efficiency

Education ✦

✦ 2010-09 ~ 2013-02

National Taipei University of Technology

Graduate Institute of Innovation and Design Master

✦ 2003-09 ~ 2007-06
